- 64-19 Flat White

64- ALKYD PRIMERS

- 64-18 Red Oxide
- 64-41 White Primer
- 64-42 Grey Primer

* must use a primer for first coat

Optimal Performance Guidelines

- Always use premium applicators. High quality brushes and lint free rollers are recommended. May be sprayed.
- Rusted surfaces must have loose and flaking rust removed. Paint must be applied to a sound surface for maximum durability and protection.
- Two or more coats must be applied for optimum protection from corrosion.
- Follow label/lid directions for application and primer requirements.
