\*If unit is being installed prior to transport, please choose a ROUGHNECK model for your application needs.

\*\*If unit is being installed on a Horse Trailer with suspensions and roof support equivalent to an RV, the use of a Roughneck model is not required.

If installation method is the TOP/DOWN MOUNTING APPLICATION, please note that the MACH 8 Series is the only unit available that can utilize the HEAT STRIP.

**NOTE:** If a MINIMUM EFFICIENCY rating is required on a permanent structure, unfortunately the Coleman-Mach line of products will not work to meet this minimum efficiency rating.
