Choose the right tape for the right job

● Recommended ▲ Acceptable X Not Recommended		Flat Surface	Curved Surface	Textured Surface	Cable Wrap
Self Laminated Tape					
	Featuring a specially formulated adhesive to wrap securely around curved surfaces with a minimum diameter of 3 mm, these tapes lets users print labels that are protected and permanently sealed with a laminated layer overwrap.	X	X	X	●
Die-cut Flag Tape					
	Formulated with a standard adhesive, these labels are ideal for wrapping thin cables such as optical fibre cables and for other labelling applications. Their handy flag design makes it convenient to read important information on equipment without having to twist or pull on cables.	X	X	X	●
Extra-strength Laminated Tape					
	Our strong adhesive tape demonstrates 50% more adhesive strength on average compared to our standard tape and is suitable for more demanding applications	●	X	●	X
Flexible ID Laminated Tape					
	Designed to stick to itself, this tape is great for wrapping around items and for labelling cylindrical surfaces such as cables, PVC piping, wire wrapping, flagging and more.	▲	●	X	●
HSe Heat Shrink Tube					
	This non-adhesive heat shrink tube tightly fits your wires and cables to cleanly identify them. Apply before connecting, then use a heat gun or lighter to permanently position labels.	X	X	X	●
Laminated Security Tape					
	Excellent for asset management, this tape features a special tell-tale tamper evident adhesive. A security pattern appears if the label is removed.	●	X	▲	X
Standard Laminated Tape					
	Unlike ordinary labels, our unique laminated tape technology ensures that your text is sandwiched between a layer of super-clear polyethylene and the durable base layer.	●	●	●	●
