BE EMBROIDERY STUDIO

- **Auto-Digitize Designs**
  Easily replicate graphic files in stitches with automatic object sequencing and color reduction options. Auto-digitize entire designs or specific sections. Combine with traditional digitizing for even more efficiency.

- **Export Files Without Interrupting Your Workflow**
  Continue digitizing while your stitch files export in the background. The Export Docker makes it easy to monitor export progress and view your export history—all without missing a beat.

- **CorelDRAW® Graphics Mode**
  Take your designs further with built-in CorelDRAW® integration. Edit and refine vector artwork directly within the embroidery software—no need to switch programs. Convert your graphics to embroidery data with ease and save hours on digitizing.

- **Customize Lettering with Over 228 Available Fonts**
  Choose from over 228 professionally digitized embroidery fonts or easily convert any TrueType Font. Enjoy full control with customizable baselines, spacing, kerning, justification, Lettering Art effects, and unique envelope shapes.

- **Automatic Appliqué**
  With just a simple click, you can create appliqué shapes that include placement stitch, tack down stitch, and cover stitch. Also includes machine frame out for easy placement and cutting.

- **Draw, Fill, and Stitch with Ease**
  Graphical digitizing tools make creating embroidery shapes as easy as drawing on-screen. Just create your shapes and fill them with stitches—it's that simple.

- **Automatic Offsets and Borders**
  Add simple offsets and borders with one click. Choose from run, triple run, or satin stitch borders for a polished finish.
