<b>LOW VOLTAGE MOUNTING BRACKETS - CSA NOT APPLICABLE</b>							
CIMB-0	Mounting bracket for low voltage class 2 communication outlets.						
CIMB-1	Mounting bracket for low voltage class 2 communication outlets. Raised 1/2 in.						
CICSB-1	Mounting bracket for low voltage communication outlets.						
WBF-1-CP	Low voltage wall bracket for class 2 communication outlets.						Bag of 2 units

\*Not CSA certified

Note: The power/communications boxes consist of a 2-1/2 in. deep device with a 90 degree folded side incorporating mounting holes for communication outlets and wire holders. The 4104 series is intended for installation on wood studs, while the 4304 series is intended for installation on 2-1/2 in. or 3-5/8 in. steel studs. The installation is completed with a standard 2 gang wall plate.

The 4204 series is intended for commercial or industrial installations on 2-1/2 in. or 3-5/8 in. steel studs and consists of a 2-1/2 in. deep box (with or without cable clamps), pre-gang with a concentric knockout box for communication and power outlet separated by a steel partition. The installation is completed with a standard 2 gang wall plate. C.E.C. 2012 edition, rule 12-3030. A partition must be used when conductors, in a multi-gang box, are connected to different sources of voltage.

Cat. No.	Description
<b>LOW VOLTAGE PLASTIC BRACKETS</b>	
LVBRNW-1	1 gang low voltage mounting bracket for new work.
LVBRNW-2-RT	2 gang low voltage mounting bracket for new work.
LVBRRW-1	1 gang low voltage mounting bracket for rework.
LVBRRW-2	2 gang low voltage mounting bracket for rework.
