 soak 5 minutes. Remove bag  
 and run water through the  
 faucet head.

Home's Lime, Calcium & Rust Remover. dissolves calcium deposits, rust stains, lime scale water spots and soap scum build up. Only available at Home Hardware and Building Centre locations. [homehardware.ca](http://homehardware.ca)

# 8 Home® Rust, Calcium & Lime Remover Cleaning Hacks You Should Know!

Safely and effectively remove calcium, lime, rust and hard water stains with this septic safe formula.

## 1 BATHROOM

Removing mineral build-up to make your bathroom sparkle and shine doesn't have to be a chore. Stubborn deposits on glass shower doors and rust-coloured stains in toilets are no competition for Home® Rust, Calcium & Lime Remover. You can also safely remove hard water residue from sinks, faucets and tubs with ease. Problem solved!

## 2 SHOWER HEAD

Mineral build-up on your shower head is unattractive and problematic as it can prevent the water from flowing at full pressure. Descale by tying a plastic bag filled with Home® Rust, Calcium & Lime Remover around the shower head, letting it soak until the deposits have loosened. Use a bowl for handheld shower heads. Run water through to rinse debris.

## 3 DISHWASHER

To get rid of white residue on your dishes, you'll need to remove the mineral deposits from your dishwasher. Although these mineral deposits are unsightly, they are not unsanitary. Pour 1/2 cup Home® Rust, Calcium & Lime Remover into the bottom of an EMPTY dishwasher. Run through a normal cleaning cycle without detergent. Lime and hard water scale are removed as easy as that!

## 4 COFFEE MAKER

When water is heated in a coffee maker, calcium and magnesium break down and precipitate to form solid lime scale. To descale, mix 1 cup Home® Rust, Calcium & Lime Remover with 8 cups water. Pour into the reservoir and run through the brew cycle. Repeat by recirculating the solution. Rinse with fresh water through the brew cycle twice.

## 5 KETTLE

Limescale can affect the performance of your kettle and also deteriorate the quality of the water. Pour enough Home® Rust, Calcium & Lime Remover to cover the build-up in the bottom of the kettle. Let it sit until all the lime scale is dissolved. Rinse several times with fresh water.

## 6 IRON

Before descaling, check the manufacturer's instructions as some irons have self-cleaning systems. Pour equal parts Home® Rust, Calcium & Lime Remover and water into the reservoir to a third full. Let the iron steam on medium heat for 5-10 minutes to empty the reservoir. Repeat with fresh water in the reservoir.

## 7 WASHING MACHINE

Descale your washing machine regularly for optimal washing results and to ensure a long machine life. In an empty drum, pour 1/4 cup Home® Rust, Calcium, Lime Remover into the detergent drawer. Run a complete wash cycle to ensure the solution goes through the entire washing machine. Repeat the same wash cycle to rinse.

## 8 FIBREGLASS BOAT HULL

A boat hull is constantly exposed to the elements and requires some TLC to keep it in tip-top shape. To remove stubborn stains, simply scrub the area with a microfibre cloth dampened with Home® Rust, Calcium & Lime Remover. Rinse with fresh water.
