## 4. Pre-Use Check

## 5. Filling

- 1) **Do:** Turn pump handle counterclockwise and remove pump
- 2) **Do:** Prepare spray solution following all directions and safety warnings on chemical label.
- 3) **Do:** Fill tank to no more than the proper gallon marker. Do NOT: over fill to accommodate pump.
- 4) **Do:** Check pump to make sure that no grass or dirt is stuck to barrel. Replace pump in tank and tighten securely.

## 8. Care, Storage and Maintenance

## 3. Filter

The filter helps prevent clogging while spraying. It is located on the end of the white tube inside your sprayer tank. To clean filter, remove the hose from the tank and lift out the outlet tube. Make sure the filter is positioned at the bottom of the tank as pictured.
