

Safe Strip

for exterior use

C17-90

DESCRIPTION

A safe ready to use product for removing water-based, oil-based, solid or semi-translucent stains and paint from exterior wood surfaces. Can be used on siding, decks, fences and furniture. Safe Strip is non-corrosive. It does not contain methylene chloride or sodium hydroxide, which are hazardous chemicals. Gel formula clings to vertical surfaces. Use with Wood Shield Best 100% Acrylic Solid Hide (1866R804-840) or Acrylic/Alkyd Semi-Transparent (1866R751-788) Deck & Siding Stains as part of the One Day system to easily complete an entire deck project in a day.

DIRECTIONS

PREPARATION: Cover plants and shrubs or wet thoroughly with water. Cover any areas you do not want to strip. Surface temperature should not be above 20°C (68°F). Do not dilute with water.

SHAKE WELL BEFORE USE. Dampen area to be stripped. Apply a uniform coat of Safe Strip using a brush or roller. Allow solution to remain on surface 20-30 minutes. Do not allow product to dry on surface. Re-apply if necessary. Scrub a small section to determine if paint or stain is lifting. When coating begins to lift, scrub using a stiff bristle brush or scraper. Do not use a wire brush. A second application may be necessary for multiple layers. **RINSE THOROUGHLY** using a pressure washer up to 500 psi or a garden hose. Rinse adjacent surfaces. If mildew is present, treat with Natura Mildew Off. Should the wood darken or if wood is greyed, or soiled, treat with Natura Wood Prep to brighten wood.

REFINISHING: To ensure maximum adhesion for Latex (water-based) stains remove pooled areas of water before application of stain. If using alkyd (oil-based) stains allow surface to dry 2-3 days.

CLEAN UP AND STORAGE: Clean tools with water.

APPLICATIONS

- Exterior wood surfaces
- Wood siding, decks, fences, furniture

BENEFITS

- Exterior paint and stain stripper
- Safe and effective
- Gel formula
- Non-corrosive
- Ready to use

SPECIFICATIONS
