

# Premium Acrylic-Modified Driveway Sealer

C210-10

## DESCRIPTION

Premium Acrylic-Modified Driveway is a durable, super black matte finish that penetrates, protects and beautifies. It resists gas, oil, salt and automotive fluids, while extending driveway life. Covers up to two times more than tar based sealers. High performance soy-based formula. Non-tracking, fast drying.

## DIRECTIONS

**SURFACE PREPARATION:** Sweep the area to be coated. Fill cracks with BlackGold Acrylic Crack Filler. Clean surface with BlackGold Concrete and Asphalt Cleaner. Rinse well.

**APPLICATION:** Lightly dampen surface (not wet) in order to obtain maximum coverage. This will also eliminate lap marks, especially in warm weather, sunny or windy days. Shake well before using. Apply sealer in a THIN uniform coat using a paint tray and split foam roller. DO NOT pour directly on the driveway and spread with a roller or squeegee. If driveway was unsealed, wait one hour and apply a second thin coat of sealer. Allow to dry 3 hours. For optimal results let dry overnight before allowing vehicle traffic. Clean up with soap and warm water.

## APPLICATIONS

- Asphalt surfaces

## BENEFITS

- Durable rich super matte black finish
- Does not contain coal tar pitch
- Superior gas and oil resistance
- Dries in 1-3 hours
- Once dry, will not track
- Soap and water clean-up

## SPECIFICATIONS

Colour ..... Black  
Fragrance ..... Ammonia  
pH ..... 9.0  
Solids..... 18.30%  
Specific Gravity..... 1.07  
Coverage – 5L..... up to 46.5 m<sup>2</sup> (up to 500 ft<sup>2</sup>)  
Coverage – 17L... up to 139 m<sup>2</sup> (up to 1500 ft<sup>2</sup>)

## AVAILABILITY

Item #	Size
2060R680 .....	5L
2060R692 .....	15L
