

SILHOUETTE

THE HIGHER PREFORMED HIP & RIDGE

Say hello to curb appeal, down to the smallest detail! With its superior two-ply laminated construction, **SILHOUETTE Hip and Ridge** is sure to bring depth to all your roofing projects!

A BP Canada-exclusive, **SILHOUETTE Hip and Ridge** will add character to your projects while making installation fast and easy:

- No cutting required – product is ready to be installed right from the box
- Increased flexibility – its SBS-modified asphalt makes it more supple and resilient
- Preformed – the angle of the shingles reduces the need for bending on-site, which can be a serious issue in our Canadian weather

SILHOUETTE Hip and Ridge is available in a range of colours designed to complement BP Canada's various lines of architectural shingles – without necessarily being an exact replica to those existing shades. This gives you all the latitude to create a bold visual statement - or to go for the opposite with harmonious tones that will shine throughout your project.

As with all other BP Canada roofing products, **SILHOUETTE Hip and Ridge** can be used as part of the BP-exclusive Weather-Tite™ roofing system. This means that it can benefit from the most comprehensive, no-fee, standard system warranty on the market!

An unparalleled look backed by an unparalleled warranty: now there's appeal that goes well beyond the curb!
