Coverage

4 litre covers 40 to 50 sq metres(400-500 sq feet).

Optimal Performance Guidelines

- Always use premium applicators. Synthetic brushes and high quality lint free rollers are recommended. May be sprayed.
- While applying paint, always maintain a wet edge and a liberal uniform film thickness. All surfaces must be clean, dull, dry and free of dust, grease, wax or any other contaminants.
- Before painting be sure that enough paint is purchased and boxed together to ensure a uniform colour.
- Follow label/lid directions for application and primer requirement.
