A young girl with long dark hair, wearing a red dress, is standing on a wooden ladder. She is reaching up with a paintbrush to touch a large, textured, greyish-blue moon that has been painted on a dark blue wall. The moon is the central focus of the image, and the girl's action suggests she is the artist. The overall scene is whimsical and creative.

Inspiration

When we think of simple yet elegant design it's Scandinavian and Japanese aesthetics that come readily to mind. The clean lines, natural materials and pared-back colour palette of Japandi style create the mindful mood so many of us are looking for right now.

SHADES OF GREY

A desire for simplicity and neutrality sees the cool smoky greys of **Subway**, **Slate Tint** and **Smoky Tone** make a welcome return to home interiors.

Come **INSIDE**...

RED ALERT

Monochrome and red combinations can be daunting, but it's all about proportion. With red **It's My Party** accenting the lower third of the wall, the effect is a vibrant yet stylish colour statement for any room.

GRAPHIC DESIGN

Natural wood softens the black accents of **Subway** in a bright **Lace Me Up** hallway. For bathrooms, go to the dark side with **Smoky Tone** walls and **Subway** panelling for a boutique hotel experience.

It's been a while since interiors favoured black, white and red. But, with these softer monochromes and a warm vivid red, this is a colour trend we're ready to welcome back into the home!

EASY LIVING

Soft, light decor is the ideal backdrop to modern marble and velvet furniture and a bold geometric rug, all by Soho Home. Get the look with walls and trim in soft **Harrow Gate**.

BATHROOMS

AND RELAX...

With wellness in mind, how we think about the bathroom is changing. More than a place to wash and go, it should be a space to relax and unwind. Stark white bathroom fittings can dominate, but with clever use of colour you can create a room you'll never want to leave!

DRAMATIC TOUCHES

A roll-top tub is a luxurious statement, even more so with the addition of a dramatic contrast colour that can be picked up through ceramic flooring and patterned textiles.

THE BEAUTY OF WOOD

There's more than one place to apply colour in a bathroom. Adding panelling is the latest way to transform any room, and in a bathroom it's a cosier alternative to tiles. And just like a painted vanity, it can be updated whenever you're in the mood for a change.

Show off your vanity in **Zenith C20-2-0647-4** or revamp panelling in **Marseilles D35-5-0525-0**

CONTRAST STORY

There's no rule that says interior doors and base boards must be neutral. Choosing a contrast colour that reflects your personality will transform a tired hallway. We love how the addition of a soft mid-blue brings interest to a fresh white space and showcases the owner's decorative touches.

SPACE TO WORK

It's time to find a place at home you'll love to work from. Our tip to define a space is by sectioning the wall horizontally using colour. With the darker shade closest to the desk, we've chosen a duo of muted blue-greens to help focus. Add light wood furnishings and house plants and your work is done!

NATURALLY NEUTRAL

When you're choosing a neutral, it's all about the undertone. Here, to complement the natural warmth of the roof tiles and rattan furniture, an exterior in soft **Mythical** works perfectly.
