

5 Reasons for Selecting Antibodies and Antigens from *Fortis* for Your Lateral Flow Assay

1

Functionally tested reagents to simplify assay optimization.

Fortis monoclonal/polyclonal antibodies and antigens are functionally tested for use in lateral flow assays.

2

De-risk your journey by using antibodies/antigens that are:

- rigorously tested to guarantee the quality of each lot tested, and
- available in high volumes.

3

Get help with your lateral flow assay from our in-house scientific experts. Benefit from:

- advanced support, and
- troubleshooting.

4

Customize your antibodies/antigens according to your assay specifications.

5

Ensure your success through our commitment to delivering high-quality reagents with

- custom capabilities, and
- superior customer support.
